

Supplier RFP Response

NexaWorks

Procurement Request: Enterprise Data & Analytics Platform Implementation

Proposal Reference: RFP-2026-014 **Submission Date:** August 2026

1. Executive Summary

NexaWorks proposes a highly capable enterprise platform emphasizing advanced architecture, scalability, governance and security. It uses a larger specialist team and comprehensive delivery model. Trade-offs are higher price and longer delivery.

2. Technical Capability

The architecture includes modular ingestion, distributed processing, governed storage, semantic models, API integration and automated monitoring, with strong scalability and extensibility detail.

3. Implementation Plan

NexaWorks proposes a 28-week phased delivery with dedicated architecture, engineering, security and QA resources. Milestones, governance checkpoints, testing cycles and risk controls are described in detail.

Phase	Duration	Key Activities
Discovery	3 weeks	Requirements and source assessment
Platform Build	5 weeks	Core platform and data model
Integration	7 weeks	Priority source integrations
Testing & Reporting	5 weeks	Dashboards, testing and remediation
Go-Live	2 weeks	Training and transition

4. Commercial Value

The commercial proposal is the highest. Costs are clearly itemized and include substantial specialist resources. Third-party licenses and major scope changes are outside the base price.

Component	Estimated Cost (USD)
Discovery & Architecture	\$220,000
Platform & Data Foundation	\$500,000
Integrations	\$650,000
Reporting & Testing	\$380,000
Transition & Knowledge Transfer	\$150,000
Total Professional Services	\$1,900,000

5. Security & Compliance

Security is a major strength, covering RBAC, MFA integration, encryption, centralized logging, vulnerability management, secure development, segregation of duties and privacy-by-design controls.

6. Support & Experience

NexaWorks describes multiple comparable enterprise data programs and a mature support model with service management, monitoring, incident response and escalation.

7. Proposal Summary

NexaWorks provides the strongest technical and security proposition, supported by substantial enterprise experience. Its main disadvantages are higher cost and longer delivery.
